

MD Senior Measurer report to MYA MD AGM 11.11.18.

A combined report of the District Senior measurer and 6m class captain.

2018 was a year of consolidation, spent time with Bill Green assisting measurement of sixes and A boats, the technical team workload was very light as we weren't consulted on anything.

The position of DSM is in my opinion a strange mix, to me the prime function should be as part of the tech team which is consulted on rule changes and measurement issues, the rest of the time it is just being a measurer, to some extent at the service of members, it should always be remembered that we put our signature on the items we measure and members should be aware we might seem a bit pedantic at times.

Six metres, new events coming on line, a Midland District series for 2019, it is planned we have 4 races split between 2 clubs, with the best 3 races to count.

I am trying to get our six metre sailors travelling about to events, a struggle but I will persevere, and I will nag hopefully succeeding eventually.

I look forward to another good year in the district and the six-metre fleet

Mike Ewart.  
MD Senior measurer.
